LIGHTING

Screws, Bolts & Nails

A. Roof nail

Used for the fixing of corrugated and IBR roof sheeting to wooden trusses. Comes with a bonded washer to ensure a watertight roofing installation. Available in lengths 65mm, 75mm, 90mm, 120mm.

B. Chipboard screw

Ideal for doing general DIY work with chipboard and other softer types of wood. The coarse thread has strong holding power.

C. Brass wood screw

Solid brass screws are rust proof but are very soft and break easily. Always drill the correct size pilot hole and pre-thread the hole with a steel wood screw before inserting the brass screw.

D. Self-drilling TEK screw

Drill and fasten roof sheeting to metal roof structures in one step. Use TEK screws with bonded washers to make sure the installation is sealed.

E. Nail-in anchor

Is easy to use and saves time when securing light to medium weight objects to walls. Drill the same size hole in the object and wall, place the anchor through the object and into the wall and then knock it in with a hammer.

F. Wire nail

Ideal for rough, and general-purpose, wood fastening. Can be used to build roof trusses and pallets. Available in sizes 25mm to 150mm.

G. Drywall screw

The sharp coarse thread provides strong holding power when fastening drywall and ceiling board to the substrate.

H. Threaded rod

Use when you can't find a bolt that is long enough. Threaded rods are 1m long and can easily be cut to the correct length with a hacksaw.

I. Hex nut

Galvanised and can be used with bolts and threaded rod to fasten components together.

J. Expansion bolt

To secure heavyweight objects to walls and floors. Available in size 5mm, 6mm, 8mm, 10mm, 12mm.
